CAUSORYN

Explore how changes could affect interconnected systems, compare alternative scenarios and review the recorded outcomes.

Product overview

A connected-system modelling prototype for comparable what-if experiments.

Potential acquirers

- Digital-twin vendors
- Systems research groups
- Engineering consultancies

Documented functions

- Compose linked system studies
- Compare declared scenarios
- Review supplied observations
- Run local combined simulations
- Retain attributable histories

Available output types

Scenario comparisons / Observation records / Simulation histories

Operations, reliability & digital twins

Defined work.
Separate written terms.

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Scope and transfer review required

• A connected-system modelling prototype. Physical prediction and cross-domain accuracy require domain-specific qualification.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed
