FusionLunar Energy Systems Engineering Platform

Compare energy and lunar-logistics concepts for your systems-engineering studies, with a separately scoped launch and transport module.

Product overview

An energy and lunar-infrastructure research platform with traceable engineering studies.

Potential acquirers

- Energy research groups
- Aerospace consultancies
- Mission architecture teams

Documented functions

- Compare energy-system scenarios
- Study lunar infrastructure
- Review logistics dependencies
- Assess engineering uncertainty
- Retain qualified release records

Available output types

Architecture comparisons / Engineering studies / Qualification dossiers

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 360,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

• Energy and lunar-infrastructure analysis software. Physical hardware, construction and demonstrated energy production are excluded.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-057 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
