LYRA-AERO eVTOL

Compare electric-aircraft design options and explore simulated flight and energy assumptions.

Product overview

An electric-aircraft analytical prototype for transparent concept comparisons.

Potential acquirers

- Electric-flight research teams
- Engineering consultancies
- Aerospace simulation vendors

Documented functions

- Review lift and power assumptions
- Compare energy requirements
- Study endurance scenarios
- Explore design alternatives
- Retain analytical audit records

Available output types

Concept comparisons / Energy studies / Design exploration reports

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 50,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

- Electric-aircraft analytical software. Physical aircraft and certified flight performance are excluded.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-091 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
