MT2050 Experimental Dynamics

Compare advanced-dynamics scenarios and review how assumptions and uncertainty affect your simulated results.

Product overview

A dynamic-systems research platform for comparable, replayable engineering studies.

Potential acquirers

- Vehicle research teams
- Simulation software vendors
- Engineering consultancies

Documented functions

- Create configurable dynamic-system studies
- Review calibration evidence
- Compare model versions
- Assess uncertainty
- Replay qualification packages

Available output types

Engineering comparisons / Calibration records / Replayable study dossiers

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 250,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-031 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
