Spatial Wearable Perception Platform

Explore spatial observations and wearable-use scenarios, with captured material available for later review.

Product overview

A spatial-perception software asset for wearable studies and controlled overlays.

Potential acquirers

- Wearable product developers
- Spatial software vendors
- Perception research teams

Documented functions

- Organise wearable observations
- Track persistent objects
- Maintain spatial overlay state
- Replay recorded sessions
- Prepare qualified release and handover records

Available output types

Spatial session records / Overlay states / Evaluation packages

Visual & spatial software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 800,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Spatial software for wearable research and evaluation. Wearable hardware and physical-device qualification are separately scoped.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step
