Synthetic Consciousness Engineering Platform

Explore controlled simulations of adaptive behaviour and compare recorded experiments to assess questions for further research.

Product overview

An experimental research asset for testable properties of synthetic-consciousness theories.

Potential acquirers

- Cognition research groups
- AI research teams
- Scientific software vendors

Documented functions

- Run controlled computational studies
- Compare candidate theoretical properties
- Review simpler research baselines
- Retain experiment histories
- Support repeatable campaign recovery

Available output types

Experiment records / Theory comparisons / Research recovery material

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 60,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

- Experimental research software. Consciousness is a research subject; demonstrated sentience is not offered.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-100 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
