Temporal Physics & Causality Research Platform

Explore causal-order questions through controlled computational-physics experiments.

Product overview

A computational physics research asset for falsifiable causal-order studies.

Potential acquirers

- Physics research groups
- Metrology teams
- Scientific software developers

Documented functions

- Define bounded research studies
- Review experimental assumptions
- Analyse declared observation counts
- Compare hypothesis evidence
- Retain reproducible study records

Available output types

Research protocols / Analysis reports / Hypothesis review dossiers

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 50,000	**Research software**

Current scope and conditions

Research software for bounded studies; scientific outcomes require their own evidence.

Available for acquisition discussion

- Computational physics research. Scientific interpretations and physical effects require independent qualification.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-058 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
