Visual-Effects-Spatial-Computing-Platform

Create and animate 2D scenes with editable layers, keyframes and bounded visual-effect controls.

Product overview

An independent local 2D authoring and visual-effects prototype with a scene editor, animation controls and a visual node graph.

Potential acquirers

- Visual authoring software teams
- Creative-tool developers
- Interactive media R&D teams

Documented functions

- Edit 2D shape and text layers
- Animate scene properties with keyframes
- Create visual-effect node graphs
- Save and reopen editable scene projects

Available output types

Editable 2D scene projects / Animation and keyframe records / Visual-effect graph projects

Visual & spatial software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 5,500	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

• An independent 2D authoring prototype. 3D, XR and computer vision remain future work. No integration with other portfolio projects is offered.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-108 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
