Reality Substrate Hypothesis Testing Platform

Compare explicitly defined research hypotheses through controlled synthetic experiments, frozen model comparisons and bounded source-data audits.

Product overview

An independent research-software framework for falsifiable model comparisons, synthetic methodological controls and bounded offline astronomical-data review.

Potential acquirers

- Scientific research organisations
- Research-software vendors
- Computational-physics and methodology teams

Documented functions

- Run clearly labelled synthetic methodological experiments
- Declare and register bounded model-neutral hypotheses
- Freeze model comparisons and review declared decisions
- Compare bounded cross-domain toy predictions
- Audit supported local astronomical metadata and files
- Reproduce and verify software evidence packages

Available output types

Synthetic experiment reports / Locked comparison records / Source-data audit summaries / Reproducibility packages / Hypothesis declaration records

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 11,000	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.15.0 development

• A research-software framework, not a simulation detector or an empirically validated physical theory.

• Synthetic results and source-data audits do not establish new physics, instrument calibration, a shared physical substrate or an external simulator.

• The documented hypothesis families and long-term cross-domain programme are research directions, not a collection of implemented model engines.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-110 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-25. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	11,000	12,312
Negotiation reference - low	9,000	10,074
Negotiation reference - high	14,000	15,670
Recreation cost estimate	37,000	41,414
Marketability cost scenario	14,310	16,017
Monetisation cost scenario	9,435	10,561
Risk-adjusted strategic reference	2,924	3,273
Weighted economic reference	15,022	16,814

Milestone-conditioned reference

Not established. No accepted next-maturity qualification or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate is the lowest explicitly scoped equivalent-effort budget below. It is not recorded expenditure, an absolute cost floor, an independent quotation or an established market value. First-party research software only. Empirical discoveries, physical theories, instrument calibration, third-party datasets, external Fermitools qualification and future model engines are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
