Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Study brain-inspired learning and behaviour through repeatable computational experiments.

Product overview

A computational-neuroscience asset for repeatable learning and behaviour studies.

Documented functions

- Run controlled neural-dynamics studies
- Compare interventions
- Review multi-source research evidence
- Assess robustness boundaries
- Retain repeatable evaluation records

Potential buyer fit

Neuroscience research groups / AI research teams / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Neural study reports / Intervention comparisons / Qualification evidence

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/bio-inspired-neural-dynamics-active-inference-simulation-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 925,000	**EUR 3,300,000**

Current repository documentation

Current main baseline: 2.2.0.

Separate development: 2.2.0 hardened draft candidate.

Use the retained v2.1.0 validated research baseline and review the newer v2.2.0 candidate separately. Full candidate validation remains outstanding.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-077-P: current documentation. TA-IP-077-C: financial-reference review, 17 October 2026. TA-IP-077-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
