Evidence Intelligence Operations Platform

Collect authorized source material, track evidence and changes, and prepare traceable intelligence dossiers and delivery bundles.

Product overview

A multi-source intelligence prototype for monitoring changes and keeping review decisions attributable.

Documented functions

- Retain source evidence
- Review temporal changes
- Define watch rules
- Route material alerts
- Manage subject dossiers and review queues

Potential buyer fit

Intelligence software vendors / Research teams / Corporate analysis teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Subject dossiers / Alert queues / Evidence-linked reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 169,000	**EUR 900,000**

Current repository documentation

Current main baseline: 6.3.0.

Separate development: 6.4.0 - unmerged authorized-document connector candidate.

Main is 6.3.0. The separate 6.4.0 candidate adds explicitly authorized, bounded local-document collection and verifiable collection receipts. Its retained report records 54 command gates and 192 tests across six installed environments. Historical 6.0.0 and 6.3.0 failures remain failures; repaired 6.3.1/6.3.2 evidence is retained separately. This publication did not rerun those product gates.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-005-P: current documentation. TA-IP-005-C: financial-reference review, 17 October 2026. TA-IP-005-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
