FusionLunar Energy Systems Engineering Platform

Compare energy and lunar-logistics concepts for your systems-engineering studies, with a separately scoped launch and transport module.

Product overview

An energy and lunar-infrastructure research platform with traceable engineering studies.

Documented functions

- Compare energy-system scenarios
- Study lunar infrastructure
- Review logistics dependencies
- Assess engineering uncertainty
- Retain qualified release records

Potential buyer fit

Energy research groups / Aerospace consultancies / Mission architecture teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Architecture comparisons / Engineering studies / Qualification dossiers

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 360,000	**EUR 2,900,000**

Current repository documentation

Current main baseline: 0.46.0.

Evaluate energy and lunar-infrastructure concepts with the implemented prototype. Launch & Cislunar Transportation Engineering Platform is its separate transport module; review both scopes and qualify the combined workflow for your intended study.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-057-P: current documentation. TA-IP-057-C: financial-reference review, 17 October 2026. TA-IP-057-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
