# Integrated Media Production Engine

Manage your media-production work from source selection to review and delivery.

## Product overview

A media-production workflow product for accountable stages and controlled delivery.

## Documented functions

- Coordinate scripting and production stages
- Review media acquisition
- Track voice and subtitle work
- Recover interrupted jobs
- Control delivery and approval records

## Potential buyer fit

Media software vendors / Production studios / Enterprise content teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Production packages / Stage records / Rights and delivery histories

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/integrated-media-production-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 457,000** | **EUR 1,275,000** |

## Current repository documentation

Current main baseline: 0.24.0.

The 0.24.0 foundation adds durable artifact-deletion claims and verified byte/size readmission. Repository records report 324 local passes per Python version with native PostgreSQL tests skipped. Prior 0.23.1 native PostgreSQL PASS remains bound to that earlier source; full native 0.24 concurrency qualification is still required. Third-party media rights and provider adapters need separate acceptance.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

## Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

## Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

## Source basis

TA-IP-038-P: current documentation. TA-IP-038-C: financial-reference review, 17 October 2026. TA-IP-038-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
