Machine Cognition Research Framework

Study adaptation and decision behaviour through repeatable experiments and comparative review.

Product overview

A bounded cognition research framework for repeatable memory and adaptation experiments.

Documented functions

- Run controlled cognitive experiments
- Study memory and uncertainty
- Compare adaptation conditions
- Review component comparisons
- Export research evidence

Potential buyer fit

Cognition research groups / AI research teams / Scientific software developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Experiment records / Comparative studies / Research dossiers

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 85,000	**EUR 690,000**

Current repository documentation

Current main baseline: 0.8.0.

The 0.8.0 research prototype adds an explicitly trained predictive-state layer alongside its separate count-based adaptation. Training and held-out evaluation are separated and retained model checkpoints bind later research runs. This is a bounded deterministic research mechanism; general intelligence, autonomous action and human-equivalent cognition are not established.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-020-P: current documentation. TA-IP-020-C: financial-reference review, 17 October 2026. TA-IP-020-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
