Manuscript Integrity & Publishing Platform

Write and assemble your chapters, track editorial evidence and defects, and prepare an author-approved manuscript for manual publication handoff.

Product overview

A manuscript-production prototype for editorial evidence and author-controlled release.

Documented functions

- Write and assemble chapters
- Inspect ordinary manuscript inputs
- Track quality evidence and defects
- Record explicit author release decisions
- Prepare manual publication handovers

Potential buyer fit

Author-software vendors / Editorial teams / Small publishing houses

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Assembled manuscripts / Editorial evidence records / Offline handover packages

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 21,000	**EUR 70,000**

Current repository documentation

Current main baseline: 0.1.0.

Separate development: 0.7.0 - documented offline staging; full application source import pending.

The repository still delivers the 0.1.0 editorial QA application. Later documents through 0.7 record creative-module curation, genre/style controls, originality work and complete author-archive placement as separate offline staging. Full later application sources are not imported and remain outside the existing 0.1 asking/recreation scope. The retained 0.1 tests and later reported checks retain their own source and execution dates.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-13.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-106-P: current documentation. TA-IP-106-C: financial-reference review, 17 October 2026. TA-IP-106-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
