# Mission-to-Execution Engineering Framework

Turn your project aims into reviewed requirements, dependency-aware plans and planning documents with traceable decisions.

## Product overview

An engineering workbench prototype for traceable requirements and execution planning.

## Documented functions

- Record mission requirements
- Organise capability and work packages
- Review dependencies and blockers
- Prepare priority-aware plans
- Generate auditable project reports

## Potential buyer fit

Engineering consultancies / Programme software vendors / Product development teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Mission charters / Requirement and plan records / Execution review packages

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/mission-to-execution-engineering-framework/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 16,500** | **EUR 55,000** |

## Current repository documentation

Current main baseline: 0.1.0.

Separate development: 0.3.0 - unmerged, stacked traceability/feasibility candidate.

Use the current local planning prototype to prepare requirements, dependencies and design documents. Main passed 24 tests; a separate unmerged v0.3 candidate passed 70 tests and its planning examples. Review labels record supplied declarations and do not independently establish engineering, scientific, legal or operational feasibility. Rights and handover documentation remain open.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

## Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

## Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

## Source basis

TA-IP-105-P: current documentation. TA-IP-105-C: financial-reference review, 17 October 2026. TA-IP-105-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
