# Modular Aerospace Research Platform

Turn aerospace observations into replayable research cases, compare declared evidence and keep uncertainty visible.

## Product overview

A research workbench for organising aerial observations and retaining uncertain events for review.

## Documented functions

- Review aerial-event observations
- Compare observations from multiple locations
- Retain events requiring investigation
- Document uncertainty
- Cross-reference permitted external records

## Potential buyer fit

Aerospace research groups / Observation-network developers / Scientific data teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Event dossiers / Observation archives / Review records

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/modular-aerospace-research-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 61,000** | **EUR 540,000** |

## Current repository documentation

Current main baseline: 0.1.0.

Separate development: 0.6.3 - unmerged STELLA research foundation.

Main retains the 0.1.0 baseline. The separate 0.6.3 STELLA candidate adds offline sensor processing, calibrated geometry, replayable evidence comparison and retained actual NOAA context. Its build report records 1,043 tests and independent validation of 96 schemas; these are source-bound repository results, not executions by this website review. Field accuracy, cross-modality fusion and mission qualification remain open.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

## Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

## Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

## Source basis

TA-IP-001-P: current documentation. TA-IP-001-C: financial-reference review, 17 October 2026. TA-IP-001-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
