Plant Environment Decision Intelligence Platform

Assess plants against site conditions, manage versioned planting plans and compare the evidence behind retained assessment results.

Product overview

A plant-environment decision workbench for site suitability, versioned planting plans and evidence-backed comparison of retained assessments.

Documented functions

- Assess several candidate species against one site
- Manage owner-scoped projects, sites and planting zones
- Retain versioned planting-plan scenarios
- Export assessment inputs, results and integrity records
- Compare retained scenarios and explain material differences

Potential buyer fit

Garden-planning software vendors / Horticultural service firms / Landscape planning teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Viability reports / Planning recommendations / Data-quality records

Current repository documentation

Current main baseline: Retained assessment-comparison build.

The current source provides bounded multi-species site assessment, owner-scoped projects, sites and zones, versioned plan scenarios, retained assessment exports and read-only scenario comparison. The comparison report records 112 Go tests, seven Python regressions and 376 file-runtime checks. Earlier native PostgreSQL evidence applies to earlier retained-evidence source; the new comparison backend still needs its own native qualification. Regional data, live weather and deployment acceptance remain separate.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-008-P: current documentation. TA-IP-008-C: financial-reference review, 17 October 2026. TA-IP-008-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
