Radioastronomy Signal Validation Platform

Review telescope signals, compare findings and assess whether candidate observations withstand further scrutiny.

Product overview

A radioastronomy evidence product for reproducible signal screening and comparison.

Documented functions

- Review telescope observations
- Screen candidate signals
- Compare analysis results
- Study calibration and recovery
- Retain observation provenance

Potential buyer fit

Radioastronomy research groups / Scientific data teams / Signal software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Signal-screening reports / Calibration studies / Evidence histories

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 275,000	**EUR 1,300,000**

Current repository documentation

Current main baseline: 7.17.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-072-P: current documentation. TA-IP-072-C: financial-reference review, 17 October 2026. TA-IP-072-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
