SonicFabric

Organise music-generation projects, manage your creations and review provider choices for your audio product.

Product overview

A generative-music product foundation for creation workflows and commercial control.

Documented functions

- Organise creation projects
- Manage generation requests
- Review external service qualification
- Track output and delivery records
- Maintain library and commercial workflows

Potential buyer fit

Music software vendors / Creator-platform developers / Audio product teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Generation job records / Creative output libraries / Delivery histories

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 650,000	**EUR 1,800,000**

Current repository documentation

Current main baseline: 0.2.0a33.

Separate development: 0.2.0a34 - unmerged evidence-selected provider routing.

Main includes the merged A33 bounded generation controls. A34 remains an open provider-routing candidate that selects from qualified provider evidence. Actual provider/model rights, hardware behavior and commercial operation stay subject to the separately qualified configuration.

Documentation checked: 17 October 2026. The main source is unchanged from the preceding directory review. Existing product qualification retains its source and execution date; tests were not rerun for this project.

Individual financial-reference review

Financial-reference review: 17 October 2026. Current main source and existing development heads reviewed. The priced scope and disclosed cost assumptions are unchanged; existing cost/asking references are retained. Market value remains NOT_ESTABLISHED. Original financial-reference date: 2026-10-12.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-046-P: current documentation. TA-IP-046-C: financial-reference review, 17 October 2026. TA-IP-046-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
