Visual-Effects-Spatial-Computing-Platform

Create local 2D scenes, animate layer properties and drive visual effects with a bounded node graph.

Product overview

An independent local 2D Canvas editor with shape/text layers, timeline/keyframes, validated JSON import/export and a typed deterministic visual-effect graph.

Documented functions

- Edit shape and text layers in a local 2D scene
- Animate transforms and opacity with keyframes
- Connect typed nodes to bounded layer outputs
- Import/export validated project JSON

Potential buyer fit

Visual authoring software teams / Creative-tool developers / Interactive media R&D teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Editable scene projects / Timeline/keyframe data / Typed visual-effect graphs

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 5,500	**EUR 19,000**

Current repository documentation

Current main baseline: 0.2.0.

An independent local 2D Canvas editor with shape/text layers, timeline/keyframes, validated JSON import/export and a typed deterministic visual-effect graph. All 24 Git blobs verified; 24 JavaScript model/graph tests and 5 Python policy/server tests passed. Browser GUI/device acceptance was not rerun. R1 is a development alpha. Full browser interaction acceptance, hardware camera checks, genuine 3D, AR/VR/XR, computer vision, physics, AI, video encoding and production packaging remain open. Architectural isolation is mandatory: no integration or shared code with other portfolio projects.

Next qualification step: Perform source-pinned browser GUI acceptance and continue the independent roadmap with explicit device and export gates.

Documentation checked: 17 October 2026. All 24 Git blobs verified; 24 JavaScript model/graph tests and 5 Python policy/server tests passed. Browser GUI/device acceptance was not rerun.

Individual financial-reference review

Financial-reference review: 17 October 2026. New present-source low-effort recreation reference EUR 19,000; seller asking choice EUR 5,500. Market value remains NOT_ESTABLISHED. Estimated hours are not logged time or expenditure. Original financial-reference date: 2026-10-17.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-108-P: current documentation. TA-IP-108-C: financial-reference review, 17 October 2026. TA-IP-108-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Local checks are disclosed per project; see the exact source receipt and retained qualification scope.
