Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Explore synthetic neural dynamics, define bounded research experiments and review comparison, lineage and reproducibility evidence within qualified environments.

Product overview

Computational-neuroscience research software for synthetic neural experiments, controlled comparisons, declared experiment/result packages and qualified-environment replay diagnostics.

Potential acquirers

- Computational-neuroscience research teams
- Research-software and simulation vendors
- AI and neural-systems methodology groups

Documented functions

- Model supported synthetic neural dynamics and perturbations
- Compare interaction stability and fixed-grid research outputs
- Declare and verify bounded experiments and result packages
- Review source-specific lineage and negative-case controls
- Capture and compare numerical replay diagnostics

Available output types

Synthetic experiment outputs / Declared experiment and result packages / Interaction and lineage reports / Environment-specific replay diagnostics

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 934,000	**Developed software**

Current scope and conditions

Developed research or product software within the identified edition and material boundaries. Intended-use and recipient acceptance remain separate.

Available for acquisition discussion

Identified edition: 2.7.0 / qualified CPU scope

• Software and synthetic-study results do not establish biological equivalence, clinical relevance, cognition or causal validity.

• Recorded CPU evidence qualifies only its identified source and environments; third-party research data retains its own rights.

• Exact numerical replay remains unresolved in another local environment, including downstream experiment qualification. Recipient-environment acceptance is required before relying on these outputs.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-077 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-26. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	934,000	1,044,959
Negotiation reference - low	747,000	835,744
Negotiation reference - high	1,171,000	1,310,115
Recreation cost estimate	3,331,500	3,727,282
Marketability cost scenario	3,256,541	3,643,418
Monetisation cost scenario	3,822,896	4,277,056
Risk-adjusted strategic reference	3,285,642	3,675,976
Weighted economic reference	3,398,737	3,802,507

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions; actual expenditure, independent quotations and market value are not established. The previously priced neural runtime, source adapters, interaction studies and lineage/fingerprint foundations are reused once. The added experiment/result declarations and diagnostics are priced as software only. Biological/scientific/clinical findings, third-party dataset ownership, universal portability, future composable-model architecture and production qualification are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
