StabilityMesh

Compare resilience scenarios for your distributed systems and study how defensive responses affect the simulation.

Product overview

A simulation environment for examining service disruption and controlled defensive responses.

Potential acquirers

- Platform engineering teams
- Reliability teams
- Infrastructure software vendors

Documented functions

- Model coupled service failures
- Observe pressure and system health
- Compare defensive resource choices
- Study degraded operating conditions
- Review historical scenario results

Available output types

Resilience dashboards / Scenario histories / Response comparisons

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 205,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

Identified edition: 1.9.1

• An engineering and simulation asset. Environment-specific calibration and operational acceptance are separate requirements.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-003 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-21. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	205,000	229,354
Negotiation reference - low	164,000	183,483
Negotiation reference - high	256,500	286,972
Recreation cost estimate	871,500	975,034
Marketability cost scenario	1,052,336	1,177,354
Monetisation cost scenario	1,000,046	1,118,851
Risk-adjusted strategic reference	1,061,740	1,187,875
Weighted economic reference	999,960	1,118,755

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The EUR 871,500 recreation estimate consists of a EUR 850,000 base and a EUR 21,500 scoped implementation budget. The seller asking reference is EUR 205,000. Effort is estimated, not logged time or actual expenditure. Market value is not established.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
