Cosmological Structure and Expansion Research Platform

Evaluate synthetic clustering and covariance methods, then screen bounded catalogue-file and FITS structures before any separately qualified observational analysis.

Product overview

A standalone cosmological research implementation with native correlation estimators, spatial indexing, jackknife covariance and offline catalogue-integrity or FITS sample checks.

Potential acquirers

- Scientific-software and astronomical-analysis vendors
- Cosmology and survey-methodology research groups
- Research teams developing numerical-assurance workflows

Documented functions

- Compute bounded synthetic correlation estimates
- Compare exact spatial-index and weighted estimators
- Evaluate leave-one-region-out covariance
- Check declared catalogue-file integrity contracts
- Inspect bounded FITS binary-table structures

Available output types

Synthetic correlation and covariance records / Independent numerical comparison reports / Catalogue-integrity and FITS sample assessments

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 16,000	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: Python 0.1.0 / native 0.7.0 / S6 FITS sampler

• Synthetic numerical and structural software checks do not establish an accepted observational dataset, a published survey reconstruction or a cosmological discovery.

• Catalogue checks have bounded sampling and format limits. Source authenticity, data licences, survey selection and scientific uncertainty require separate admission and review.

• The local job-admission prototype is not an authenticated or isolated hosted service. Production hosting and further physical inference are outside the present offer.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-114 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	16,000	17,875
Negotiation reference - low	13,000	14,524
Negotiation reference - high	20,000	22,344
Recreation cost estimate	53,500	59,770
Marketability cost scenario	20,691	23,116
Monetisation cost scenario	13,643	15,242
Risk-adjusted strategic reference	4,228	4,724
Weighted economic reference	21,722	24,268

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate adopts the lowest expressly scoped seller effort scenario. It is not recorded expenditure, an absolute minimum, an independent quote or established market value. Only the agreed first-party numerical, synthetic research and catalogue-screening work is priced. Other assets, observational data rights, accepted survey inference, physical discoveries, hosted services and future programmes are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
