HΛRM LYRA Automotive

Explore the LYRA automotive concept and compare its design assumptions through engineering analysis and simulation.

Product overview

An automotive engineering-analysis asset for the LYRA RS programme.

Potential acquirers

- Automotive research teams
- Engineering consultancies
- Vehicle concept developers

Documented functions

- Maintain design parameters
- Review chassis and powertrain studies
- Compare aerodynamic calculations
- Track structural evidence
- Export engineering telemetry

Available output types

Design study records / Parameter dossiers / Engineering comparisons

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 55,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.1.0

• Automotive engineering-analysis software. Physical vehicles, manufacturing assets and certified vehicle performance are excluded.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-089 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	55,000	61,446
Negotiation reference - low	45,000	50,274
Negotiation reference - high	70,000	78,204
Recreation cost estimate	450,000	502,740
Marketability cost scenario	309,825	346,136
Monetisation cost scenario	258,188	288,448
Risk-adjusted strategic reference	153,622	171,626
Weighted economic reference	279,870	312,671

Milestone-conditioned reference

EUR 330,368; model change EUR 50,498. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
