ModularKey Cryptanalysis Platform

Explore classical ciphers, test candidate interpretations and review your cryptanalysis results.

Product overview

A modular environment for analysing supported classical ciphers and comparing candidate interpretations through a consistent research workflow.

Potential acquirers

- Cryptography education providers
- Historical-text researchers
- Security research teams

Documented functions

- Analyse supported classical cipher families
- Plan and compare analysis methods
- Review candidate and exploratory family evidence
- Assess representative calibration examples
- Export comparable research results

Available output types

Candidate interpretations / Comparison reports / Calibration summaries

Security, identity & traceability

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 101,000	**Developed software**

Current scope and conditions

Classical-cipher research software for bounded analysis and comparison. Intended-use acceptance is agreed for the delivery edition.

Available for acquisition discussion

Identified edition: 2.12.0

• Classical-cipher research software; no capability to break modern encryption systems or independently certified security service is claimed.

• Family evidence is exploratory. General classifier accuracy and independent out-of-sample performance are not established.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-007 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-22. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	101,000	112,443
Negotiation reference - low	79,500	88,507
Negotiation reference - high	127,000	141,389
Recreation cost estimate	477,000	531,044
Marketability cost scenario	350,595	390,317
Monetisation cost scenario	329,130	366,420
Risk-adjusted strategic reference	120,067	133,671
Weighted economic reference	297,218	330,893

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses the previously priced classical-cipher engine. Production security certification and claims against modern cryptographic systems are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
