Autonomous Documentary Engine

Develop documentary stories from your source material and manage their production and delivery.

Product overview

Documentary production software with sealed evidence finalization, API idempotency, dependency inventory/security checks, PostgreSQL migration integrity and portable CI evidence packaging.

Potential acquirers

- Documentary software vendors
- Production studios
- Research publishers

Documented functions

- Evidence finalization and API idempotency beyond 0.9.11
- Dependency inventory and PostgreSQL migration-integrity verification
- Portable CI packages and certification-preflight invalidation

Available output types

Documentary packages / Source and rights records / Production histories

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 631,000 · indicative USD 707,603

Identified edition: 0.9.21

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.9.21 source, documentation and retained evidence: Documentary production software with sealed evidence finalization, API idempotency, dependency inventory/security checks, PostgreSQL migration integrity and portable CI evidence packaging. Full production qualification, ten live fixtures, independent reviewers, media rights and any publication authorization remain separate.

• Full production qualification, ten live fixtures, independent reviewers, media rights and any publication authorization remain separate.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Freeze the 0.9.21 first-party delivery and reconcile source-specific acceptance records.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Reconcile the current sealed release and provenance evidence with the exact recipient delivery package.

• Review confidential security and credential-handling materials within the agreed diligence and transfer scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	631,000	707,603
Negotiation reference - low	504,800	566,083
Negotiation reference - high	788,750	884,504
Recreation cost estimate	2,520,500	2,826,489
Marketability cost scenario	3,780,750	4,239,733
Monetisation cost scenario	5,293,050	5,935,626
Risk-adjusted strategic reference	6,090,646	6,830,050
Weighted economic reference	4,576,611	5,132,212

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 192 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 20,500 adopted recreation increment and EUR 6,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

The captured main repository-validation workflow is successful. The source adds a 14-gate certification preflight and stale-output invalidation; this is an engineering qualification record.

Remaining limits

Full production qualification, ten live fixtures, independent reviewers, media rights and any publication authorization remain separate.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — Documentary production software with sealed evidence finalization, API idempotency, dependency inventory/security checks, PostgreSQL migration integrity and portable CI evidence packaging. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-055 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
