CardioSignal Intelligence Platform

Review ECG signal quality and compare research results for your cardiac-signal studies.

Product overview

A cardiac-signal research prototype for quality assessment and controlled evaluation.

Potential acquirers

- Cardiac research groups
- Scientific software vendors
- Medical research tool developers

Documented functions

- Inspect supplied cardiac signals
- Review signal quality
- Govern dataset records
- Compare predictions with declared references
- Track model acceptance decisions

Available output types

Signal quality reports / Benchmark records / Model review dossiers

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 250,000 · indicative USD 280,350

Identified edition: 0.13.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Cardiac-signal research and quality-analysis software. Clinical diagnosis and certified medical performance are excluded.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Third-party licensing and obligations documentation remains incomplete.

• A security assessment or an explicit statement of its absence is required before acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	250,000	280,350
Negotiation reference - low	200,000	224,280
Negotiation reference - high	315,000	353,241
Recreation cost estimate	1,250,000	1,401,750
Marketability cost scenario	1,038,594	1,164,679
Monetisation cost scenario	1,075,781	1,206,381
Risk-adjusted strategic reference	870,810	976,526
Weighted economic reference	1,040,159	1,166,434

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 1,275,228; model change EUR 235,069.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documents WFDB source provenance, split-locks, ONNX runtime equivalence, deterministic signal preprocessing and Python 3.10–3.13 CI configuration.

Remaining limits

No clinical sensitivity/specificity or arrhythmia diagnosis certification; multisegment execution validation remains fixture-layout bound, source data rights and cross-device efficacy need proof.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A cardiac-signal research prototype for quality assessment and controlled evaluation. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-078 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
