Chimera Spectral Perception System

Assess imaging concepts and compare acquisition options before planning a physical trial.

Product overview

An imaging R&D prototype for coordinated observations and physical-study preparation.

Potential acquirers

- Imaging product developers
- Scientific instrument teams
- Perception research groups

Documented functions

- Prepare multi-view imaging studies
- Review feasibility assumptions
- Coordinate acquisition records
- Assess timing and calibration
- Bind physical campaign evidence

Available output types

Imaging study plans / Acquisition histories / Campaign qualification records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 125,000 · indicative USD 140,175

Identified edition: 0.15.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Imaging research software. Physical sensor hardware and qualified field performance are not included.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Third-party licensing and obligations documentation remains incomplete.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	125,000	140,175
Negotiation reference - low	100,000	112,140
Negotiation reference - high	160,000	179,424
Recreation cost estimate	1,200,000	1,345,680
Marketability cost scenario	606,900	680,578
Monetisation cost scenario	459,000	514,723
Risk-adjusted strategic reference	172,723	193,692
Weighted economic reference	573,633	643,272

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 650,782; model change EUR 77,149.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README records synthetic exact-match, serial/SDK mismatch tests, evidence packages and multi-camera calibration contracts. Canonical Basler device identity remains unbound.

Remaining limits

Real Basler hardware discovery, synchronized acquisition, calibrated physical performance and sensor-to-photon timing not established. Proprietary CSPS does not include ownership of third-party pylon SDK.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An imaging R&D prototype for coordinated observations and physical-study preparation. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-067 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
