Songwriting Intelligence & Creative Production Platform

Evidence-linked songwriting and controlled revision software with private workspace, recovery and deployment-assurance foundations, plus a separate offline editorial-export candidate.

Product overview

Deterministic author-controlled editorial ZIP handoff and a detached, hash-anchored ledger of human song-review decisions.

Potential acquirers

- Music and creator-software vendors
- Songwriting and publishing businesses
- Private creative-workflow operators

Documented functions

- Deterministic editorial ZIP export and read-only verification
- Detached editorial decision ledger and external digest anchor
- CLI privacy, tampering and isolated runtime qualification

Available output types

Lyric projects and revision comparisons / Controlled workflow records / Migration and recovery review packages / Deployment and compatibility assessments

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 328,500 · indicative USD 368,380

Identified edition: 3.34.0

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party 3.34.0 source, documentation and retained evidence: Deterministic author-controlled editorial ZIP handoff and a detached, hash-anchored ledger of human song-review decisions. Plaintext lyrics and notes require private handling. Hashes do not prove reviewer identity, legal rights or publication approval. Recurring subscriptions and live deployment remain unqualified.

• Plaintext lyrics and notes require private handling. Hashes do not prove reviewer identity, legal rights or publication approval. Recurring subscriptions and live deployment remain unqualified.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Freeze the 3.34.0 first-party delivery and reconcile source-specific acceptance records.

• Agree the exact qualified baseline and development-candidate delivery scope.

• Complete compatibility, integration, operator/security and recipient acceptance for the intended environment.

• Review component obligations, transferable rights and the final delivery manifest.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	328,500	368,380
Negotiation reference - low	262,800	294,704
Negotiation reference - high	410,625	460,475
Recreation cost estimate	1,094,000	1,226,812
Marketability cost scenario	1,258,100	1,410,833
Monetisation cost scenario	1,550,745	1,739,005
Risk-adjusted strategic reference	1,269,343	1,423,441
Weighted economic reference	1,279,539	1,434,875

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 96 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 10,000 adopted recreation increment and EUR 3,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Retained source acceptance: 24/24 disposable Colab CPU gates, 403 regressions and 418 pytest cases on each real Python 3.10–3.13 environment. Documentation-only launch planning is not a new software acceptance.

Remaining limits

Plaintext lyrics and notes require private handling. Hashes do not prove reviewer identity, legal rights or publication approval. Recurring subscriptions and live deployment remain unqualified.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — Deterministic author-controlled editorial ZIP handoff and a detached, hash-anchored ledger of human song-review decisions. The offered edition and material boundaries govern review.

Evidence and validation: E2 — The retained 3.32 acceptance covers its recorded source and runtime matrix. Current 3.33 local replay reports a failed regression: a prior test still expects the previous CLI target. Full new-release acceptance remains open. Independent recipient and intended-use acceptance remain separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-021 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
