Evidence-Grounded Multi-Expert Reasoning System

Compare declared reasoning strategies, preserve contradictory or inconclusive results and audit matched controlled-study and replication packages.

Product overview

Evidence-grounded multi-expert reasoning software with matched baselines, controlled-study protocols and cross-model replication evidence packages.

Potential acquirers

- Reasoning and evaluation software vendors
- Enterprise AI assurance teams
- Research organisations conducting controlled model studies

Documented functions

- Route tasks through declared specialist strategies
- Govern capability and strong-baseline comparisons
- Prepare controlled-study evidence packages
- Bind cross-model runs to matched protocols
- Verify nested evidence, lineage and report integrity

Available output types

Controlled-study and replication packages / Baseline comparison and consistency reports / Verifiable audit and provenance records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 519,000 · indicative USD 582,007

Identified edition: 2.1.0 / engineering release

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party implementation and documentation for 2.1.0 / engineering release. Previously priced routing, grounding, evaluation, canonical fingerprints and custody foundations are reused once. Added governed capability/baseline, controlled-study and cross-model replication software is included. Real model-provider runs, H1–H7 scientific success, model or human superiority, empirical data ownership and later development phases are excluded.

• The v2.1 engineering release qualifies the study machinery; real model-backed H1–H7 scientific exit and independent scientific assessment remain separate.

• Fixture outcomes do not establish model superiority, human-level performance or cross-domain robustness. Later roadmap promotion remains conditional on accepted scientific evidence.

• External models, provider services, datasets, deployment and attributable commercial outcomes require separate rights, scope and acceptance.

Conditions before handover

• Freeze the exact source edition, agreed first-party work, rights and exclusions.

• Keep engineering acceptance separate from real model-backed H1–H7 scientific exit and later phase promotion.

• Review source-specific reproducibility, component and security evidence under agreed confidentiality.

• Complete intended-use and recipient-environment acceptance before relying on the identified outputs.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	519,000	582,007
Negotiation reference - low	415,500	465,942
Negotiation reference - high	649,000	727,789
Recreation cost estimate	1,869,000	2,095,897
Marketability cost scenario	2,364,285	2,651,309
Monetisation cost scenario	2,901,623	3,253,880
Risk-adjusted strategic reference	2,385,413	2,675,002
Weighted economic reference	2,355,326	2,641,263

Cost basis

The retained expressly priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced routing, grounding, evaluation, canonical fingerprints and custody foundations are reused once. Added governed capability/baseline, controlled-study and cross-model replication software is included. Real model-provider runs, H1–H7 scientific success, model or human superiority, empirical data ownership and later development phases are excluded.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README reports v2.0 281/281 tests and 22/22 stages; PR #27 scientific real-model H1–H7 inputs and preflight remain unmerged, H1–H7 NOT_MET.

Remaining limits

No measured real-model/human superiority, causal expert benefit or scientific H1–H7 success; draft model-execution carrier is not actual experimental evidence.

Development position

Research v2.1 — Real-model H1–H7 execution preparation (scientific NOT_MET)

Acquisition evidence profile

Technical scope: V — Evidence-grounded multi-expert reasoning software with matched baselines, controlled-study protocols and cross-model replication evidence packages. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-053 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
