Integrated Media Production Engine

Manage your media-production work from source selection to review and delivery.

Product overview

A media-production workflow product for accountable stages and controlled delivery.

Potential acquirers

- Media software vendors
- Production studios
- Enterprise content teams

Documented functions

- Coordinate scripting and production stages
- Review media acquisition
- Track voice and subtitle work
- Recover interrupted jobs
- Control delivery and approval records

Available output types

Production packages / Stage records / Rights and delivery histories

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 457,000 · indicative USD 512,480

Identified edition: 0.24.0

Developed software · Conditional handover

Current scope and conditions

Existing first-party 0.24.0 source (default-branch snapshot), including the described implemented increment. Full native 0.24 PostgreSQL/concurrency qualification remains open. Prior 0.23.1 database PASS is not promoted to 0.24. Media/model rights, hosted operation and future provider acceptance are excluded.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• An explicit delivery manifest and handover scope remain to be agreed.

• Review confidential security and credential-handling materials within the agreed diligence and transfer scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	457,000	512,480
Negotiation reference - low	366,500	410,993
Negotiation reference - high	574,000	643,684
Recreation cost estimate	1,275,000	1,429,785
Marketability cost scenario	1,912,500	2,144,678
Monetisation cost scenario	2,677,500	3,002,549
Risk-adjusted strategic reference	3,080,966	3,454,995
Weighted economic reference	2,315,088	2,596,140

Cost basis

The recreation anchor combines an identified base with separately scoped implementation work. The base remains a seller assumption; the scoped component has a role/work-package reproduction budget. Each component is counted once.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

v0.23.1 exact source reported 322 tests each on Python 3.11/3.13 and 52 native PostgreSQL tests; v0.24 local tests have 54 PostgreSQL skips and PGlite two native concurrency skips.

Remaining limits

v0.24 full native PostgreSQL 378+101 zero-skip acceptance outstanding; no vendor media download or legal third-party media clearance, no production reliability claim.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A media-production workflow product for accountable stages and controlled delivery. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R3 — R2 plus SBOM/lockfile and provenance/rights-supporting evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-038 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
