LatticeDepth

Organise subsurface-material records and assess the evidence available for a research or acquisition review.

Product overview

A research platform for assessing materials evidence and preparing reviewable qualification and transfer records.

Potential acquirers

- Materials research groups
- Scientific assurance vendors
- Engineering data teams

Documented functions

- Organise subsurface-materials evidence
- Assess research qualification records
- Review trust continuity
- Coordinate multi-party evidence approval
- Prepare offline acquisition review outputs

Available output types

Qualification summaries / Governed review records / Transfer review packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 256,500 · indicative USD 287,639

Identified edition: 0.0.23

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.0.23 implementation, documentation and retained developer evidence, subject to delivery-specific verification.

• Materials research and evidence-governance software; no physical operation, hardware safety authority or independent scientific certification is offered.

Conditions before handover

• Agree and freeze the exact first-party delivery edition, rights, third-party obligations and excluded content.

• Review source-specific reproducibility, component and security documentation under agreed confidentiality.

• Complete the relevant application qualification and recipient handover acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	256,500	287,639
Negotiation reference - low	206,000	231,008
Negotiation reference - high	322,000	361,091
Recreation cost estimate	855,000	958,797
Marketability cost scenario	835,762	937,224
Monetisation cost scenario	1,327,388	1,488,533
Risk-adjusted strategic reference	843,231	945,599
Weighted economic reference	941,511	1,055,810

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses the previously priced materials-evidence platform. Physical experiments, hardware authority and scientific qualification are excluded.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source describes trust-root transition and governance checks; full source Colab rerun and scientific G1–G9 gates remain open.

Remaining limits

No beam control, exposure recipe, facility authorization, scientific experiment acceptance or legal IP title clearance.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A research platform for assessing materials evidence and preparing reviewable qualification and transfer records. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R3 — R2 plus SBOM/lockfile and provenance/rights-supporting evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-043 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
