Organismal State Dynamics Research Platform

Study changes in organismal regulation through controlled models and documented observations.

Product overview

A research workbench for organismal state changes and controlled human-state hypotheses.

Potential acquirers

- Human-state research groups
- Scientific software vendors
- Behavioural research teams

Documented functions

- Organise research observations
- Record protocol execution
- Review signal quality
- Study bounded state hypotheses
- Compare simulation and participant evidence

Available output types

Protocol records / State-study reports / Research evidence packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 120,000 · indicative USD 134,568

Identified edition: 0.7.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Research software for organismal and human-state hypotheses. Empirical conclusions require suitable study evidence.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	120,000	134,568
Negotiation reference - low	95,000	106,533
Negotiation reference - high	150,000	168,210
Recreation cost estimate	900,000	1,009,260
Marketability cost scenario	747,787	838,568
Monetisation cost scenario	774,563	868,595
Risk-adjusted strategic reference	626,983	703,099
Weighted economic reference	748,914	839,832

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 918,164; model change EUR 169,250.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source enumerates deterministic ingestion, per-channel QC, scalar Gaussian estimation, first-order twin sensitivity and task-accessibility experiments; exact current test reports not independently executed.

Remaining limits

Reference latent models and simulations are not biological or patient-specific digital twins; no evidence of consciousness detection, diagnosis, therapy, clinical safety or consent-compliant regulated records.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A research workbench for organismal state changes and controlled human-state hypotheses. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R3 — R2 plus SBOM/lockfile and provenance/rights-supporting evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-066 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
