Protein Structure Evidence Qualification Platform

Review computational protein-structure evidence and identify which questions still need scientific investigation.

Product overview

A protein-structure evidence workbench for controlled model admission and scientific review.

Potential acquirers

- Biotechnology research teams
- Computational biology groups
- Scientific software vendors

Documented functions

- Register computational structure evidence
- Compare independent model records
- Review model integrity
- Track scientific approval gates
- Retain canonical review decisions

Available output types

Structure review dossiers / Integrity findings / Gate-decision records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 100,000 · indicative USD 112,140

Identified edition: Delivery edition to be agreed

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Computational biology research software. Model outputs do not establish experimental or clinical validation.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	100,000	112,140
Negotiation reference - low	80,000	89,712
Negotiation reference - high	125,000	140,175
Recreation cost estimate	1,000,000	1,121,400
Marketability cost scenario	505,750	567,148
Monetisation cost scenario	382,500	428,936
Risk-adjusted strategic reference	143,936	161,410
Weighted economic reference	478,028	536,061

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 542,319; model change EUR 64,291.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source machine status: two computational model routes admitted, one fails required geometry checks; Gate 1 not review-ready, Gate 2 not authorized.

Remaining limits

No qualified protein folding/binding, therapeutic efficacy, clinical safety, target blockade or Gate 1 closure.

Development position

Bump rpds-py from 2026.6.3 to 2026.9.1

Acquisition evidence profile

Technical scope: P — A protein-structure evidence workbench for controlled model admission and scientific review. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-015 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
