Radioastronomy Signal Validation Platform

Review telescope signals, compare findings and assess whether candidate observations withstand further scrutiny.

Product overview

A radioastronomy evidence product for reproducible signal screening and comparison.

Potential acquirers

- Radioastronomy research groups
- Scientific data teams
- Signal software vendors

Documented functions

- Review telescope observations
- Screen candidate signals
- Compare analysis results
- Study calibration and recovery
- Retain observation provenance

Available output types

Signal-screening reports / Calibration studies / Evidence histories

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 275,000 · indicative USD 308,385

Identified edition: 7.17.0

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	275,000	308,385
Negotiation reference - low	220,000	246,708
Negotiation reference - high	345,000	386,883
Recreation cost estimate	1,300,000	1,457,820
Marketability cost scenario	1,270,750	1,425,019
Monetisation cost scenario	1,491,750	1,672,848
Risk-adjusted strategic reference	1,282,106	1,437,754
Weighted economic reference	1,326,237	1,487,242

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README documents six public GBT scans, 70/79 strict and 79/79 drift-aware comparator matches, zero level-3 events, and a 61 ZIP/628,733,216 byte retained Drive migration inventory.

Remaining limits

Full source/evidence/HDF5 import to one reconstructable Git repository not complete; completeness checker intentionally fails. No technosignature, extraterrestrial origin or real-time telescope operation claim.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A radioastronomy evidence product for reproducible signal screening and comparison. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-072 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
