Software Asset Engineering Platform

Inspect a software project, review its recorded evidence and limitations, and prepare a documented package for an acquisition review.

Product overview

A software-inspection prototype for documented asset review and handover preparation.

Potential acquirers

- Developer-tool vendors
- IP transaction teams
- Engineering organisations

Documented functions

- Inspect supplied software work products
- Retain review snapshots
- Record supported findings
- Prepare repair-note proposals
- Create review and handover dossiers

Available output types

Inspection reports / Repair-note proposals / Asset review packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 75,000 · indicative USD 84,105

Identified edition: v0.1.0

Prototype · Conditional handover

Current scope and conditions

Present first-party local software-inspection, evidence, bounded review-proposal and package-preparation prototype, its CLI/local interface, source contracts, documentation and retained validation at the identified v0.1.0 commit. Ingested-project execution, arbitrary-code isolation, broader adapters, production SaaS, hosting, rights certification, third-party ownership and future development are excluded.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Agree and freeze the engine asset delivery manifest, included rights and first-party provenance for the identified release.

• Reconcile the pinned build-tool licences and final component obligations for the agreed delivery scope.

• Complete recipient verification and acceptance of the engine delivery package; generated input-project dossiers remain separate draft review records.

• Qualify the intended local deployment and its security boundary. Input-project execution, a general sandbox and multi-tenant SaaS are not delivered.

• Retain explicit NOT_RUN and UNSUPPORTED input-project outcomes; engine tests do not establish an inspected project’s runtime correctness, title or value.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	75,000	84,105
Negotiation reference - low	60,000	67,284
Negotiation reference - high	93,750	105,131
Recreation cost estimate	250,000	280,350
Marketability cost scenario	210,375	235,915
Monetisation cost scenario	194,062	217,621
Risk-adjusted strategic reference	104,311	116,974
Weighted economic reference	179,896	201,735

Cost basis

Disclosed base/increment assumptions reconcile to the retained recreation anchor. Effort remains an analyst estimate for its original scope.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Milestone-conditioned reference

EUR 215,435; model change EUR 35,539.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README documents directory/ZIP snapshots, bounded AST inspection, evidence packaging, repair proposals, rights dossiers and source-distribution verifier.

Remaining limits

Does not build, install or execute analyzed third-party source and records those gates NOT_RUN. No private SaaS account/tenant production service or independently cleared title/FTO/market price.

Development position

Build: Octavia SaaS tenant registry and durable static-job control plane

Acquisition evidence profile

Technical scope: P — A software-inspection prototype for documented asset review and handover preparation. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R3 — R2 plus SBOM/lockfile and provenance/rights-supporting evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-097 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
