VIORITH Mobile Camera Overlay

Explore camera overlays and review captured observations for your mobile perception workflows.

Product overview

A phone-first spatial product for camera overlays, observation and session review.

Potential acquirers

- Mobile experience developers
- Perception software vendors
- Camera-product teams

Documented functions

- Review live camera observations
- Display orientation-aware overlays
- Track object identity
- Capture permitted sessions
- Replay recorded session evidence

Available output types

Camera overlays / Session packages / Tracking review records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 185,500 · indicative USD 208,020

Identified edition: 0.7.0

Developed software · Conditional handover

Current scope and conditions

Existing first-party 0.7.0 source (default-branch snapshot), including the described implemented increment. The marker provider and software demo do not establish general scene understanding, production-detector accuracy or physical-device qualification.

• Mobile and browser reference workflows. General scene understanding and physical-device qualification require separate review.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	185,500	208,020
Negotiation reference - low	149,500	167,649
Negotiation reference - high	232,000	260,165
Recreation cost estimate	875,000	981,225
Marketability cost scenario	1,106,875	1,241,250
Monetisation cost scenario	1,358,438	1,523,352
Risk-adjusted strategic reference	1,116,766	1,252,341
Weighted economic reference	1,102,681	1,236,546

Cost basis

The recreation anchor combines an identified base with separately scoped implementation work. The base remains a seller assumption; the scoped component has a role/work-package reproduction budget. Each component is counted once.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source reports historical v0.4 58 tests, v0.5 21, v0.6 26 and v0.7 30 scoped tests on simulated red/green/blue markers; full clean-checkout gate not established.

Remaining limits

Synthetic marker scope is not general semantic perception; production detector qualified=false, physical devices and sensor-to-photon lag unmeasured.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A phone-first spatial product for camera overlays, observation and session review. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-081 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
