Telluric Actualization Research Platform

Organise geophysical hypotheses and compare the evidence supporting your research questions.

Product overview

A geophysical hypothesis research asset for structured evidence and repeatable studies.

Potential acquirers

- Geophysics research groups
- Scientific software vendors
- Research assurance teams

Documented functions

- Organise hypothesis evidence
- Review source-study records
- Track qualification progress
- Prepare repeatable sessions
- Expose missing evidence

Available output types

Qualification sessions / Hypothesis reports / Evidence review records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 55,000 · indicative USD 61,677

Identified edition: 0.23.0.dev0

Research software · Scope closure required

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Geophysical hypothesis research software. Physical effects and field applicability require suitable scientific evidence.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

Conditions before handover

• Repository licence file not identified.

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Third-party licensing and obligations documentation remains incomplete.

• A security assessment or an explicit statement of its absence is required before acceptance.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	55,000	61,677
Negotiation reference - low	45,000	50,463
Negotiation reference - high	70,000	78,498
Recreation cost estimate	600,000	672,840
Marketability cost scenario	232,050	260,221
Monetisation cost scenario	153,000	171,574
Risk-adjusted strategic reference	47,414	53,170
Weighted economic reference	243,605	273,179

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 286,816; model change EUR 43,211.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README records 6/6 syntax checks on newest module, 181/181 older 0.17.dev source tests; real IPGP MATLAB/Octave PSV data/execution and parity were unavailable, G1/G2/G3/G4/G6 blocked.

Remaining limits

No empirical TAM validation, observed reversal-boundary data, independent replication, G1–G6 closure or new full-tree PASS; synthetic GPTS input is pipeline-only.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: R — A geophysical hypothesis research asset for structured evidence and repeatable studies. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R0 — No repository licence evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-074 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
