Temporal Causality Breakthrough Research Platform

Preregistered binary-study and research-custody software accompanied by conditional theoretical studies of local scalar-field, horizon and constraint assumptions.

Product overview

Preregistered binary-study and research-custody software accompanied by conditional theoretical studies of local scalar-field, horizon and constraint assumptions.

Potential acquirers

- Research-methods and scientific-software developers
- Foundational-physics research organisations
- Evidence-integrity and experimental-protocol teams

Documented functions

- Prepare fixed binary-study commitments and statistical audits
- Maintain study-bound custody and artifact-integrity records
- Verify streamed local evidence files and their order
- Publish complete local evidence records without replacing targets
- Review explicit theoretical assumptions, controls and unresolved physical gates

Available output types

Preregistered study and conditional statistical reports / Custody-chain and local-artifact verification records / Research-screening and evidence-publication assessments

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 14,000 · indicative USD 15,700

Identified edition: 0.1.0 / custody v3 and CR-OPEN-22 research review

Research software · Conditional handover

Current scope and conditions

The previously priced binary-study, custody, streaming and local publication-assurance software is retained once. Conditional research documents through CR-OPEN-22 are described, with no increment for an unproved physical result. Hardware, independent witness services, global physical validation and future experiments remain excluded.

• The executable study/custody source is unchanged and its local regression replay passes. The added CR-OPEN-17 through CR-OPEN-22 material is conditional research documentation.

• Local scalar/constraint calculations do not establish globally consistent backreaction, a stable physical time machine, independently witnessed chronology or a controllable future-to-past message.

• The prior software cost anchor is retained. Theoretical hypotheses and additional documents receive no physical-breakthrough or market-value premium.

Conditions before handover

• Freeze the specific first-party source, delivery documents, transferable rights and exclusions.

• Review retained source-specific qualification and further independent or intended-use acceptance.

• Keep third-party rights, future capabilities and unverified empirical claims outside the agreed proprietary scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	14,000	15,700
Negotiation reference - low	11,000	12,335
Negotiation reference - high	17,000	19,064
Recreation cost estimate	45,500	51,024
Marketability cost scenario	17,597	19,733
Monetisation cost scenario	11,603	13,012
Risk-adjusted strategic reference	3,596	4,033
Weighted economic reference	18,474	20,717

Cost basis

The retained priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced binary-study, custody-v3 and research-screening foundations are retained once. The increment covers file verification, streaming and atomic publication assurance only. Speculative physical mechanisms, a time-travel result, independent witness services, hardware and future experiments receive no monetary premium. Review on 2026-11-03: The previously priced binary-study, custody, streaming and local publication-assurance software is retained once. Conditional research documents through CR-OPEN-22 are described, with no increment for an unproved physical result. Hardware, independent witness services, global physical validation and future experiments remain excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Repository documents software custody schemas, publication hardening and constrained GR/wormhole/energy-condition analyses; R1 14 tests and R2A 27 local tests are historical limited gates.

Remaining limits

No reproducible information transfer from future to past, time machine, physical causal violation or independent apparatus-based breakthrough. Negative results and mathematical constraints must be preserved.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: R — Preregistered binary-study and research-custody software accompanied by conditional theoretical studies of local scalar-field, horizon and constraint assumptions. The offered edition and material boundaries govern review.

Evidence and validation: E2 — The executable study/custody source is unchanged and its local regression replay passes. The added CR-OPEN-17 through CR-OPEN-22 material is conditional research documentation. Independent recipient and intended-use acceptance remain separate.

Rights and component obligations: R1 — Repository licence file identified. Source-specific diligence and recipient acceptance remain separate.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Source-specific diligence and recipient acceptance remain separate.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. Source-specific diligence and recipient acceptance remain separate.

Buyer information and next step

Quote TA-IP-113 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
