TrueLane Studio: Apex Architect

Compare vehicle configurations, examine measured results and review proposed improvements before further tuning work.

Product overview

A vehicle-independent engineering product for comparable tuning and qualification studies.

Potential acquirers

- Vehicle engineering teams
- Automotive software vendors
- Engineering consultancies

Documented functions

- Run vehicle configuration studies
- Compare calibration alternatives
- Review learning evidence
- Prepare portable engineering packages
- Replay regression studies

Available output types

Configuration comparisons / Calibration studies / Qualification packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 300,000 · indicative USD 336,420

Identified edition: 2.0.0

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	300,000	336,420
Negotiation reference - low	240,000	269,136
Negotiation reference - high	375,000	420,525
Recreation cost estimate	1,200,000	1,345,680
Marketability cost scenario	1,242,000	1,392,779
Monetisation cost scenario	1,377,000	1,544,168
Risk-adjusted strategic reference	1,253,099	1,405,225
Weighted economic reference	1,262,385	1,415,639

Cost basis

Some dated work-package assumptions are disclosed, but they do not reconstruct the complete retained recreation anchor. A complete scope-specific budget is required.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

PR #18 states independent CPU Colab 8/8 gates and 129 tests on pinned runtime candidate; PR #19 future-validation lock has separate pending full tests; neither PR merged.

Remaining limits

Real engine/vehicle calibration, manufacturer compliance and field predictive accuracy not proven. Stacked PR #19 depends on #18 merge and its own exact-source gates.

Development position

TrueLane — locked forward validation and long-term engineering objectives; TrueLane Studio — source-group holdout checks for model learning proposals

Acquisition evidence profile

Technical scope: V — A vehicle-independent engineering product for comparable tuning and qualification studies. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-080 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
