Universal Capability Synthesis Engine (UCSE)

Find and compare software capabilities for your requirements, then assess how suitable components could work together.

Product overview

A software-capability discovery and qualification prototype for evidence-led choices.

Potential acquirers

- Developer-tool vendors
- Enterprise architecture teams
- Technology research groups

Documented functions

- Describe required capabilities
- Discover candidate software
- Review admission evidence
- Compare benchmark records
- Retain composition provenance

Available output types

Capability inventories / Candidate comparisons / Qualification decisions

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 150,000 · indicative USD 168,210

Identified edition: 0.1.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	150,000	168,210
Negotiation reference - low	120,000	134,568
Negotiation reference - high	190,000	213,066
Recreation cost estimate	800,000	897,120
Marketability cost scenario	860,200	964,628
Monetisation cost scenario	931,500	1,044,584
Risk-adjusted strategic reference	721,236	808,794
Weighted economic reference	810,773	909,201

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 1,008,165; model change EUR 197,392.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README documents scoped GitHub discovery, SQLite source/evidence scoring, hard qualification filters, benchmark registry and reproducible candidate rankings.

Remaining limits

Popularity is not engineering proof. No completed broad synthesis, independent security audit, full licence adjudication, third-party redistribution grants or production software component superiority.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A software-capability discovery and qualification prototype for evidence-led choices. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-091 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
