Universal Remote Perception Intelligence Platform

Plan controlled perception studies, preserve blind-study records and review what the recorded results can support.

Product overview

An offline perception-research prototype for controlled experiments and evidence review.

Potential acquirers

- Perception research groups
- Scientific software vendors
- Imaging research teams

Documented functions

- Prepare bounded perception studies
- Review supplied observations
- Compare declared reconstruction hypotheses
- Record blinded study conditions
- Retain attributable research results

Available output types

Study protocols / Observation dossiers / Hypothesis comparison reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 33,000 · indicative USD 37,006

Identified edition: 0.4.0

Prototype · Scope closure required

Current scope and conditions

Existing first-party offline controlled-study, custody, scoring and IP-governance software, its documentation and tests, with a separately identified unmerged P1.2 candidate. Seven internal component records are counted once within this project. Physical sensing hardware, hidden-object inference, scientifically demonstrated anomalous or sensor-free perception, independent custody/security certification, third-party rights and future research are excluded.

• A research prototype for preliminary review. Rights and transfer permissions must be clarified before an acquisition can close.

Conditions before handover

• Resolve the expressly reported BLOCKED commercial transfer gate: reconcile component origin records, first-party rights and the documented ownership evidence before handover.

• Freeze the exact main v0.4.0 and any expressly included unmerged P1.2 source, documentation and recipient delivery checks.

• Reconcile runtime contracts, historical experiment formats and dependency obligations for the agreed delivery.

• Qualify independent operators, separate hosts and externally preserved study commitments for your intended research; local test folders do not establish independent blinding.

• Keep physical sensing, hidden-target efficacy and sensor-free/nonlocal perception outside the demonstrated software scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	33,000	37,006
Negotiation reference - low	26,400	29,605
Negotiation reference - high	41,250	46,258
Recreation cost estimate	110,000	123,354
Marketability cost scenario	71,528	80,211
Monetisation cost scenario	63,113	70,775
Risk-adjusted strategic reference	35,466	39,772
Weighted economic reference	66,841	74,955

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 78,733; model change EUR 11,892.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source reports 34/34 P1.1 local tests, later 47/47 IP-governance tests and deterministic binomial scoring with sealed prediction/reveal records.

Remaining limits

No physical sensing hardware, unexplained perception effect, independent nonlocal anomaly, validated AI perception model or commercially cleared legal chain of title.

Development position

P1.2: Repository security hardening, canonical evidence, custody recovery and offline audit

Acquisition evidence profile

Technical scope: P — An offline perception-research prototype for controlled experiments and evidence review. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-101 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
