Universal Sensor Fusion & Digital Twin Intelligence Platform

Bring operational observations into a digital-twin view and review changes with their uncertainties.

Product overview

A domain-neutral twin software foundation for operational observation and supervised review.

Potential acquirers

- Digital-twin vendors
- Industrial software teams
- Systems integrators

Documented functions

- Organise operational observations
- Review estimated state and uncertainty
- Supervise bounded workflows
- Recover retained sessions
- Replay evaluation histories

Available output types

Twin state records / Operational reports / Replay evidence

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 240,000 · indicative USD 269,136

Identified edition: 1.8.0

Developed software · Conditional handover

Current scope and conditions

Present first-party v1.8.0 software. The separate v1.8.1 hardening PR is unmerged and excluded from the v1.8.0 cost scope. Domain calibration, physical sensor accuracy and production acceptance remain open.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Agree exact first-party rights, component obligations and excluded content in the definitive agreement.

• Freeze a release-specific delivery manifest and complete recipient acceptance.

• Complete independent security review or expressly accept its absence within the local reference scope.

• Review the unmerged v1.8.1 candidate separately.

• Qualify physical-domain models, representative telemetry and production conditions.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	240,000	269,136
Negotiation reference - low	194,000	217,552
Negotiation reference - high	301,500	338,102
Recreation cost estimate	797,000	893,756
Marketability cost scenario	962,377	1,079,210
Monetisation cost scenario	1,183,545	1,327,227
Risk-adjusted strategic reference	970,977	1,088,854
Weighted economic reference	968,276	1,085,825

Cost basis

The EUR 797,000 recreation estimate consists of a EUR 780,000 base and a EUR 17,000 scoped implementation budget. The seller asking reference is EUR 240,000. Effort is estimated, not logged time or actual expenditure. Market value is not established.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documents deterministic channel source attribution, stream snapshots, fencing and human-supervised reference decisions; PR #11 exact-source full suite NOT_RUN.

Remaining limits

No production safety, calibrated RUL or live multi-source clock synchronization; no automatic actuation; v1.8.1 remains unmerged.

Development position

v1.8.1 — full-repository hardening candidate + finite JSON bounds

Acquisition evidence profile

Technical scope: V — A domain-neutral twin software foundation for operational observation and supervised review. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-025 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
