Universal Vehicle Configuration Database

Find source-supported vehicle configurations and see where the available information is complete or still uncertain.

Product overview

Offline vehicle evidence software extended with tenant/API quotas, an internal browser portal, synthetic signed billing events and a Stripe-format offline event inbox.

Potential acquirers

- Automotive software vendors
- Vehicle-data product teams
- Engineering platforms

Documented functions

- Local tenant, quota and internal portal modules beyond the priced research corpus
- Synthetic signed billing custody and offline Stripe-format inbox
- Integrated offline admission and rejection qualification

Available output types

Vehicle reference records / Configuration selections / Evidence review packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 131,000 · indicative USD 146,903

Identified edition: 0.5.6.dev0 / merged offline milestones through PR29

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.5.6.dev0 / merged offline milestones through PR29 source, documentation and retained evidence: Offline vehicle evidence software extended with tenant/API quotas, an internal browser portal, synthetic signed billing events and a Stripe-format offline event inbox. No live payments, public SaaS, OEM commercial redistribution grant, physical fitment proof or production vehicle actuation. Offline signatures do not prove real payment.

• No live payments, public SaaS, OEM commercial redistribution grant, physical fitment proof or production vehicle actuation. Offline signatures do not prove real payment.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Freeze the 0.5.6.dev0 / merged offline milestones through PR29 first-party delivery and reconcile source-specific acceptance records.

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• An explicit delivery manifest and handover scope remain to be agreed.

• Agree and freeze the exact development-branch delivery perimeter before transfer; the later open candidate is excluded.

• Review third-party source rights and vehicle-specific compatibility separately; no production or programming authorization is offered.

• Production deployment, live-provider acceptance and real payment integration are not established; any later candidate delivery requires separate agreement.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	131,000	146,903
Negotiation reference - low	104,800	117,523
Negotiation reference - high	163,750	183,629
Recreation cost estimate	1,070,500	1,200,459
Marketability cost scenario	941,772	1,056,103
Monetisation cost scenario	921,299	1,033,145
Risk-adjusted strategic reference	789,630	885,491
Weighted economic reference	916,610	1,027,886

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 192 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 20,500 adopted recreation increment and EUR 6,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Milestone-conditioned reference

EUR 1,126,152; model change EUR 209,542.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

The main merge records independent master Colab PR01–29 acceptance at 92/92, with the executed code tree reconciled to documentation changes. PR30 metadata preflight remains an unmerged candidate.

Remaining limits

No live payments, public SaaS, OEM commercial redistribution grant, physical fitment proof or production vehicle actuation. Offline signatures do not prove real payment.

Development position

SaaS: offline-only Stripe inbox read-only metadata preflight

Acquisition evidence profile

Technical scope: P — Offline vehicle evidence software extended with tenant/API quotas, an internal browser portal, synthetic signed billing events and a Stripe-format offline event inbox. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-093 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
