Adaptive Network Resilience Intelligence Platform

Compare network recovery options, resource constraints and scenario robustness before deciding what to investigate or build.

Product overview

A research platform for evaluating network disruption and recovery choices with traceable comparative outputs.

Potential acquirers

- Infrastructure engineering teams
- Network research groups
- Resilience consultancies

Documented functions

- Model network disruption and recovery scenarios
- Compare bounded repair and resource options
- Review recovery-option trade-offs
- Assess scenario robustness
- Export traceable evaluation summaries

Available output types

Scenario comparisons / Recovery-option summaries / Evaluation reports

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 99,000	**Developed software**

Current scope and conditions

Network-resilience research software with separately identified development extensions. Field qualification and release-specific recipient acceptance are separate.

Scope and transfer review required

Identified edition: 3.7.0

• Research simulations and software checks do not establish physical network resilience or universal optimisation.

• Development extensions are offered separately from the published release and require delivery-specific acceptance.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-002 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	99,000	110,603
Negotiation reference - low	78,000	87,142
Negotiation reference - high	125,000	139,650
Recreation cost estimate	541,000	604,405
Marketability cost scenario	397,635	444,238
Monetisation cost scenario	275,910	308,247
Risk-adjusted strategic reference	136,177	152,137
Weighted economic reference	317,621	354,846

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses the priced release foundation. Only implemented development software is included; independent network/field qualification and future release work are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
