Evidence-Governed Intelligence Platform

Register bounded evidence, review policy conditions and retain attributable decisions, provenance and human-approval records.

Product overview

An in-memory evidence-governance reference implementation with policy enforcement, bounded authority, delegation and human-approval workflows.

Potential acquirers

- Evidence-workflow software vendors
- Enterprise governance and compliance teams
- Controlled research-workflow developers

Documented functions

- Register evidence and trace provenance
- Evaluate reviewed policy and applicability conditions
- Constrain authority and delegated actions
- Require scoped human approval where declared
- Retain local accountability and contestability records

Available output types

Evidence and policy-decision records / Authority and approval assessments / Auditable governance workflow packages

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 13,000	**Prototype**

Current scope and conditions

An early implemented prototype for bounded evaluation. Durable operation, wider engines and recipient acceptance remain separate.

Available for acquisition discussion

Identified edition: R4 / package 0.2.0.dev1

• R4 qualifies an in-memory reference implementation. Durable storage, APIs, production interfaces and the broader AI, risk and digital-twin programme remain later development.

• Policy and authority gates organise software decisions; they do not authenticate external facts, confer legal authority or establish regulatory or scientific acceptance.

• Legacy source archives, other portfolio assets, third-party content and future modules require separate scope and rights review.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-095 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	13,000	14,524
Negotiation reference - low	10,500	11,731
Negotiation reference - high	16,000	17,875
Recreation cost estimate	43,500	48,598
Marketability cost scenario	36,605	40,895
Monetisation cost scenario	33,767	37,724
Risk-adjusted strategic reference	18,150	20,277
Weighted economic reference	31,302	34,971

Milestone-conditioned reference

Not established. No accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. The previously priced R3 contract, evidence and provenance foundations are reused once. Added first-party R4 governance, policy, authority, approval and accountability software is included. The legacy corpus, other assets, durable persistence, APIs, user interfaces, broader AI/risk/digital-twin engines and future productisation are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method
