Gossquibble

Prepare entertainment-satire publishing workflows and review bounded release, cost, encryption and recovery conditions before any separately approved launch.

Product overview

A standalone prelaunch publishing-software asset with controlled editorial workflows, operating-cost review, joint synthetic recovery, optional encryption qualification and temporary nonce/commit rehearsal.

Potential acquirers

- Digital media publishers
- Entertainment editorial teams
- Publishing-workflow software vendors

Documented functions

- Organise editorial, timing and controlled release workflows
- Review bounded usage-cost and incident records
- Rehearse joint static-site and synthetic database recovery
- Review retention, key-custody and optional encryption conditions
- Exercise encrypted synthetic restoration and temporary nonce journals

Available output types

Editorial and release-review packages / Usage-cost and incident reports / Synthetic recovery and retention assessments / Encryption and journal qualification reports

Audio, publishing & media

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 43,000	**Prototype**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: R5.41 prelaunch

• Prelaunch software with offline qualification; live publication, licensed news sources, editorial/legal acceptance and real host operation remain separately gated.

• Recovery and encryption exercises use explicitly synthetic disposable material. They do not establish durable real backups, recoverable production keys, independent anti-rollback, offsite custody or recovery-time guarantees.

• Optional third-party cryptography is qualified only in the stated test scope. Production integration, licensed content, real paid services and an operating publication are excluded unless separately agreed.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-109 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	43,000	48,040
Negotiation reference - low	34,000	37,985
Negotiation reference - high	53,500	59,770
Recreation cost estimate	143,000	159,760
Marketability cost scenario	109,395	122,216
Monetisation cost scenario	101,351	113,229
Risk-adjusted strategic reference	54,242	60,599
Weighted economic reference	96,884	108,239

Milestone-conditioned reference

Not established. No accepted next-maturity qualification or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions, not actual expenditure, independent quotations or market value. The previously priced editorial, release, cost, continuity and prelaunch rehearsal foundations are reused once. Added joint recovery, retention, bounded key-custody/encryption and synthetic journal software is included. Real source/content rights, customer or operator data, durable production backups, host provisioning, paid API use and publication are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
