Temporal Causality Breakthrough Research Platform

Prepare bounded prediction studies, audit local evidence custody and screen proposed temporal-causality mechanisms against explicit scientific acceptance conditions.

Product overview

Independent research software and documentation for preregistered binary studies, local evidence-custody integrity and critical temporal-causality mechanism screening.

Potential acquirers

- Research-methods and scientific-software developers
- Foundational-physics research organisations
- Evidence-integrity and experimental-protocol teams

Documented functions

- Prepare fixed prediction-study commitments
- Evaluate declared binary null hypotheses
- Maintain run-specific local custody records
- Detect altered or incompatible evidence chains
- Screen mechanism proposals against explicit scientific gates

Available output types

Study commitments and statistical audit records / Local custody and integrity assessments / Research decision and mechanism-screening documents

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 10,500	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.1.0 / custody v3 and research screening

• The current work is research and evidence-integrity software. No controllable information transfer to the past or physical temporal-causality breakthrough has been demonstrated.

• Local hashes, custody records, simulated studies and statistical significance do not independently establish chronology, identity or physical causation.

• Independent witnesses, a defensible physical mechanism, real experiments and replicated scientific acceptance remain separate. Speculative physical builds remain on hold.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-113 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-31. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	10,500	11,731
Negotiation reference - low	8,500	9,496
Negotiation reference - high	13,000	14,524
Recreation cost estimate	34,500	38,543
Marketability cost scenario	13,343	14,907
Monetisation cost scenario	8,798	9,829
Risk-adjusted strategic reference	2,726	3,045
Weighted economic reference	14,007	15,649

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate adopts the lowest expressly scoped seller effort scenario. It is not recorded expenditure, an absolute minimum, an independent quote or established market value. Only the agreed first-party study, custody and research-screening work is priced. Other portfolio assets, physical devices, independently witnessed chronology, experimental breakthroughs, third-party works and future programmes are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
