Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

Identified edition: Phase 2B.2A / PostgreSQL qualification harness

• The engineering baseline and local software checks do not establish real PostgreSQL runtime acceptance; that remains an open delivery gate.

• Recipient deployment, tenant migration, security review, studio compliance, payment-provider integration and real-world stencil suitability require separate qualification.

• The pinned database driver and other third-party components retain their own terms; the offered proprietary value covers first-party work.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. The previously priced studio, geometry, workflow, authentication and migration foundations are reused once. Added first-party persistence adapters and qualification tooling are included. Real PostgreSQL operation, production tenant migration, payment services, clinical or regulatory acceptance, hosting and third-party ownership rights are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
